INTERNATIONAL SEARCH REPORT

In

tional application No.
PCT/DK 02/00749

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:

2. Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:

3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)

This International Searching Authority found multiple inventions in this International application, as follows:

see additional sheet

1. As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.

2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.

3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:

4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- The additional search fees were accompanied by the applicant's protest.
- No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. Claims: 1-78,81

To satisfy the requirement of unity, the inventions have to be linked so as to form a single general inventive concept. Since there exists no common feature which can be considered as a special technical feature within the meaning of PCT Rule 13.2, second sentence, see wording below, no technical relationship within the meaning of PCT Rule 13 can be seen.

Claims 1-78, 81 relates to a control system comprising adaptive user interface means; and the use of the control system comprising adaptive user interface means; and a motion detector used in the control system comprising adaptive user interface means.

2. Claims: 79-80

Claims 79-80 relate to a motion detector comprising a set of partial detectors of different types with respect to detection characteristics.
